

The flexibility of reefer containers over reefer vessels has added to the increased popularity of this product which is available as a 40ft high cube SeaFresh marine container. Other sizes are available upon request.

- Structure filled using high-tec even flow insulation to ensure no airpockets and full adhesion to eliminate de-lamination
- Anti corrosion materials used throughout to maximise container life
- Stainless steel internal lining
- CFC free ozone friendly refrigerant
- Microprocessor temperature control to hold temperature within very close tolerance
- Microprocessor retains operational history to assist with trouble shooting and cargo monitoring
- Sub floor corrugated pressing to eliminate damage and give maximum floor support
- Automatic drain in floor with back flow feature to prevent air ingress

In addition a range of refrigerated machinery is available to suit individual operator's requirements.

Specification	40ft High Cube
External Length (mm)	12,192
Width	2,438
Height	2,896
Internal Length	11,584
Width	2,294
Height	2,557
Cubic Capacity (m ³)	67.9
Euro pallets	22
Maximum gross weight (kg)	34,000
Tare (kg)	4,800
Payload (kg)	29,200
Gooseneck tunnel	Fitted
Refrigerated machinery	Customer choice

Actual measurements and other specification details may vary from those shown due to Sea Axis's policy of continual product development.
